

What is her name?

One day, under the walls of the Llŷn maritime Museum was found...a skeleton ! Forensic tests tell us that this skeleton dates back to the Age of the Welsh Princes, some 850 years ago. And, apparently, it is a rare surviving example from this period, and important as it is **female**. We have been fortunate in securing funding from the Heritage Lottery Fund and Garfield Weston to enable us to undertake a major conservation project to reconstruct and exhibit this skeleton in her original stone 'cist' grave here at our museum in Nefyn, and to interpret her story.

Scientists can tell us many things about this woman—her age, height, her favourite food— but they cannot tell us her name. Who was she ? Can you help?
